

PAV is a renowned card producer for global players in every industry. Whatever the requirement, be it highly heat resistant cards for hot regions of the planet, or contactless cards for access control – our employees will work with you to develop the customised solution you need.

For more than two decades already, we use proven chip components made by market leaders. The cards are produced in our high-security zone, which meets the very toughest security requirements.

In all our corporate activities, we strive for wise and thrifty use of resources. We have been granted DIN ISO EN 14001 certification for our eco-management system.

Our range of card products includes:

- Contactless cards plastic cards
- Chip cards,
- Heat-resistant cards
- Electronic health cards
